(54) CREDIT CARD

(57)Abstract:

PURPOSE: To provide a credit card capable of performing automatic dialing by transmitting a DTMF signal.

CONSTITUTION: This card is the credit card comprised by adhering two thin plastic boards 2, 3. A magnetic stripe is adhered on the plastic board 2. While, a solar battery 21, a paper speaker (SP) 22, a dial selection key 23, and a circuit board 25 are embedded in the plastic board 3. When the dial selection key 23 is depressed, the DTMF signal can be generated based on a telephone number allocated to the key, and it is outputted from the paper speaker (SP) 22. Furthermore, a user can store by inputting a desired telephone number by using an EEPROM, a button 101, and the dial selection key 23. Also, a lithium battery can be used instead of the solar battery.

LEGAL STATUS

[Date of request for examination] 26.02.2001
 [Date of sending the examiner's decision of rejection] 15.11.2002
 [Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
 [Date of final disposal for application]
